

# **PATHOS**

**PRO SPEARFISHING**

A person is seen from behind, wearing a dark wetsuit, looking out at a vast, choppy ocean under a bright sky. The sun is low on the horizon, creating a shimmering reflection on the water's surface. The person's head is slightly tilted back, and their arms are at their sides.

**PATHOS**  
PRO SPEARFISHING

**Pathos** : Passion, ancient Greek word denoting an intense and enduring emotion, the irresistible desire that tightly binds the soul  
This desire stems from the need for transfer of limits and the perception of the world that surrounds it

## Our company

The company "Pathos Pro Spearfishing" was originally born from Angelos Michalopoulos desire to create an innovative speargun. It was based on an idea conceived in 1996 but also stemmed from his love for fishing and the sea

The manufacturer's family, since 1970, has been active in the wider market of marine equipment producing mainly swimming products, such as masks, fins, snorkels, etc

The first speargun was released in 2000, after having been tested by experienced spearfishermen

The most critical aspect of the gun and the point of superiority over others was the inverted trigger mechanism

The tests results proved to be spectacular and were further confirmed during the Champions League of Kassos in 2002

Dozens of world champions, that attended the competition

tested the new speargun and were impressed by the ergonomics of the anatomic handle as well as the gun's performance

After a stagnant period of speargun innovation

the Pathos technology became the catalyst for an evolution in speargun design

Soon after, Pathos and the Italian company Effesub initiated a successful collaboration

which yielded the sale of more than 12,000 spearguns, 5,000 handles

and countless related accessories in the European market mainly but also worldwide

Over the years the Pathos speargun has been steadily improving

The embedded driver for the shaft on the rigid pipe, the open muzzle, and the ergonomic handle

which also evolved from the D'Angelo I to the D' Angelo II

make the weapon simpler and more functional. "Dead lengths" of the spearguns have been eliminated by 17 cm

The reverse trigger mechanism eliminated 7cm of useless space and another 10 cm

were removed by utilizing shorter shafts on guns with open muzzles

All Pathos spearguns are equipped with Sandvik stainless steel shafts

and floppers, a kind of material characterized by extraordinary hardness and memory

In 2006, Pathos proved to be a leading innovator in the spearfishing world once again

The goal was to develop a product that would improve a major piece of spearfishing equipment, the fin

The introduction of new materials allowed for the construction of a foot pocket much lighter than the competitors

Combining the advanced technology of design with the power and flexibility

of the Pathos foot pockets, any blades would perform at their highest level

The superiority of the Pathos foot pockets to other manufacturers was clearly evident upon use

**Today**, our Company provide a full spearfishing product line such as Spearguns, wetsuits carbon fins, waterproof equipment bags, footpockets (6 colours), branded clothes, accessories and we have local distributors in 37 countries

Thanks to the high quality machinery owned by our company we are able to manufacture our catalogue products in Greece instead of outsourcing abroad !

Any product created in our facilities is manufactured with care in detail and, most importantly, with great passion

Thus, our passion embraces all those who love the sea and fishing with a single breath

## ALMA

Designed for both entry level and advanced freedivers, most suitable for hunting around the reefs, and bottom diving. Handle D'Angelo I low profile with reverse trigger mechanism that adds extra 7cm of arming length.

The ergonomic design gives the feeling that the speargun is an extension of your hand.

Removable reinforced loading butt.

Driver sleeve and reel base.

Fully anodized aluminum barrel 1.25±0.05mm thick.

Closed muzzle for screw-on bands with position for a second band.

6.25mm Sandvik notched shaft with a single flopper and a tri-cut point.

17.5mm black over amber bands with plastic threads.

Articulate wishbone, short.

Also Available with open muzzle (for circular bands)

Any one of the four Pathos reels can be installed

### PATHOS PRO

The Pathos Pro Speargun is designed for new and experienced spearos who are looking for a lightweight and powerful tool  
a gun that shoots straight and is extremely maneuverable  
6.5mm Sandvik notched shaft with a single flopper and a tri-cut point  
Open muzzle Carina for screw-on bands with position for a second band  
Handle D'Angelo I low profile with reverse trigger mechanism that adds extra 7 cm of aiming length

The ergonomic design gives the feeling that the speargun is an extension of your hand  
Removable reinforced loading butt  
Reel base  
19.0mm black over amber bands with plastic threads . Articulate wishbone, short  
Fully anodized aluminium barrel 1.25±0.05mm thick with a shaft guide and a sharkskin surface for reduction of turbulent vortices  
Any one of the four Pathos reels can be installed

### PATHOS OPEN CARBON

This series of spearguns are very attractive for the way they perform on blue open water on pelagics, but also for big bottom fishes. The Pathos Open Carbon Speargun is designed for experienced spearos who pursue prey that require fast and powerful shots.

#### Characteristics

- Handle D'Angelo I low profile with reverse trigger mechanism that adds extra 7 cm of arming length
- The ergonomic design gives the feeling that the speargun is an extension of your hand
- Removable reinforced loading butt
- Reel base
- carbon barrel 2.0mm thick with the option of adding a carbon shaft guide 100%
- Open muzzle for two bands
- 7.0mm Sandvik shaft with sharkfins, a single flopper, and a tri-cut point
- Two 17.5mm black over amber bands
- Dyneema wishbones
- Any one of the four Pathos reels can be installed

### SARAGOS

The sensation of high accuracy and dominance in the water prevails when using this gun. It targets demanding spearos who aim for smooth and powerful shots.

The new full stainless steel reverse trigger mechanism allows for quick release of the shaft due to an extremely short travel path (7mm) regardless of the load. They are mostly suitable for hunting around the reef and for bottom diving of sea breams, snappers or similar thanks to his small diameter shaft.

Characteristics

- Handle D'Angelo II low profile with stainless steel reverse trigger mechanism that adds extra 7 cm of arming length
- Removable rubber loading butt
- Reel base
- Fully anodized aluminium barrel 1.25±0.05 mm thick with a shaft guide and a sharkskin surface for reduction of turbulent vortices
- Open muzzle with position for a second band
- 6.25mm Sandvik notched shaft with a single flopper and a tri-cut point
- 17.5mm black over amber bands with plastic threads
- Articulate wishbone, short

## SNIPER

The Sniper is the ultimate speargun,  
Aluminum barrel mild-forming  
with enclose track with the floater Sepia already applied  
new handle D'Angelo 3 universal, new muzzle  
with 2 holes that allows the bands to be in perfect position when charged  
Shaft 6,75mm with shark fins and TNT 16mm Power bands,  
The shape of the barrel makes this gun very easy to move in the water and very light.  
The enclose track make the shoot very accurate and fast

Available length

## SHAFTS

PATHOS Shafts are made with the best stainless steel of the market, the SANDVIK. They are also heat treated to increase the hardness and to avoid bending. shafts are manufactured using computer numeric machine (CNC)

we can divide our shafts in 3 groups:

NOTCHES  
SHARK FIN  
THREAD

In all except thread we have 1 flopper or 2 floppers available of 5 and 7 cm  
Pathos designed shark fin Tab, is smooth finished in order to be used with dynema wishbone.  
we use 3 or 4 tabs where one can be used like rest tab.  
Also we have 3 kind of shark fins tabs, Small, Medium, and Large  
Medium and Large, can hold more than one power band with dynema wishbone.  
All Pathos shafts has tri-cut point

SHAFTS SCREW 7x100

available  
7mm from 65cm until 120cm

#### WISHBONES

Pathos manufacture all kind of wishbone with the best quality stainless steel and mylons

We have many kinds of wishbones in terms of leghts and diameters and shapes

With plastic threads for screw-on bands , or just steel for bands per meter

Also we provide dynema wishbones

The Special Shape of the plastic threads minimize turbulences during the shoot

REEL vertical 50m COD 574  
Capability of 50 m of 1,7mm rope.  
And easy release system for safety

## REELS

All the reels has screws and internal parts in stainless steel to make them very strong.  
Made of the best nylon and fibreglass,  
Thes reels have everything a spearo needs

### MED MASK

Spearfishing mask with low inner volume and great visibility, very comfortable silicon, this model features a particular finish in the nose area to ease compensation.

MED mask COD 983

### MICRO MASK

Freediving and deep spearfishing mask, with very low inner volume and very good visibility, ultra soft silicon.

MICRO mask COD 982

### MED SNORKEL

Snorkel in PVC and very comfortable silicon.

MED snorkel COD 984

### SILICONE BELT WHITE

The Silicon belt is very elastic and resistant to sun light and salt water, this particular color helps the safety in deep use because the diver can be seen from surface.

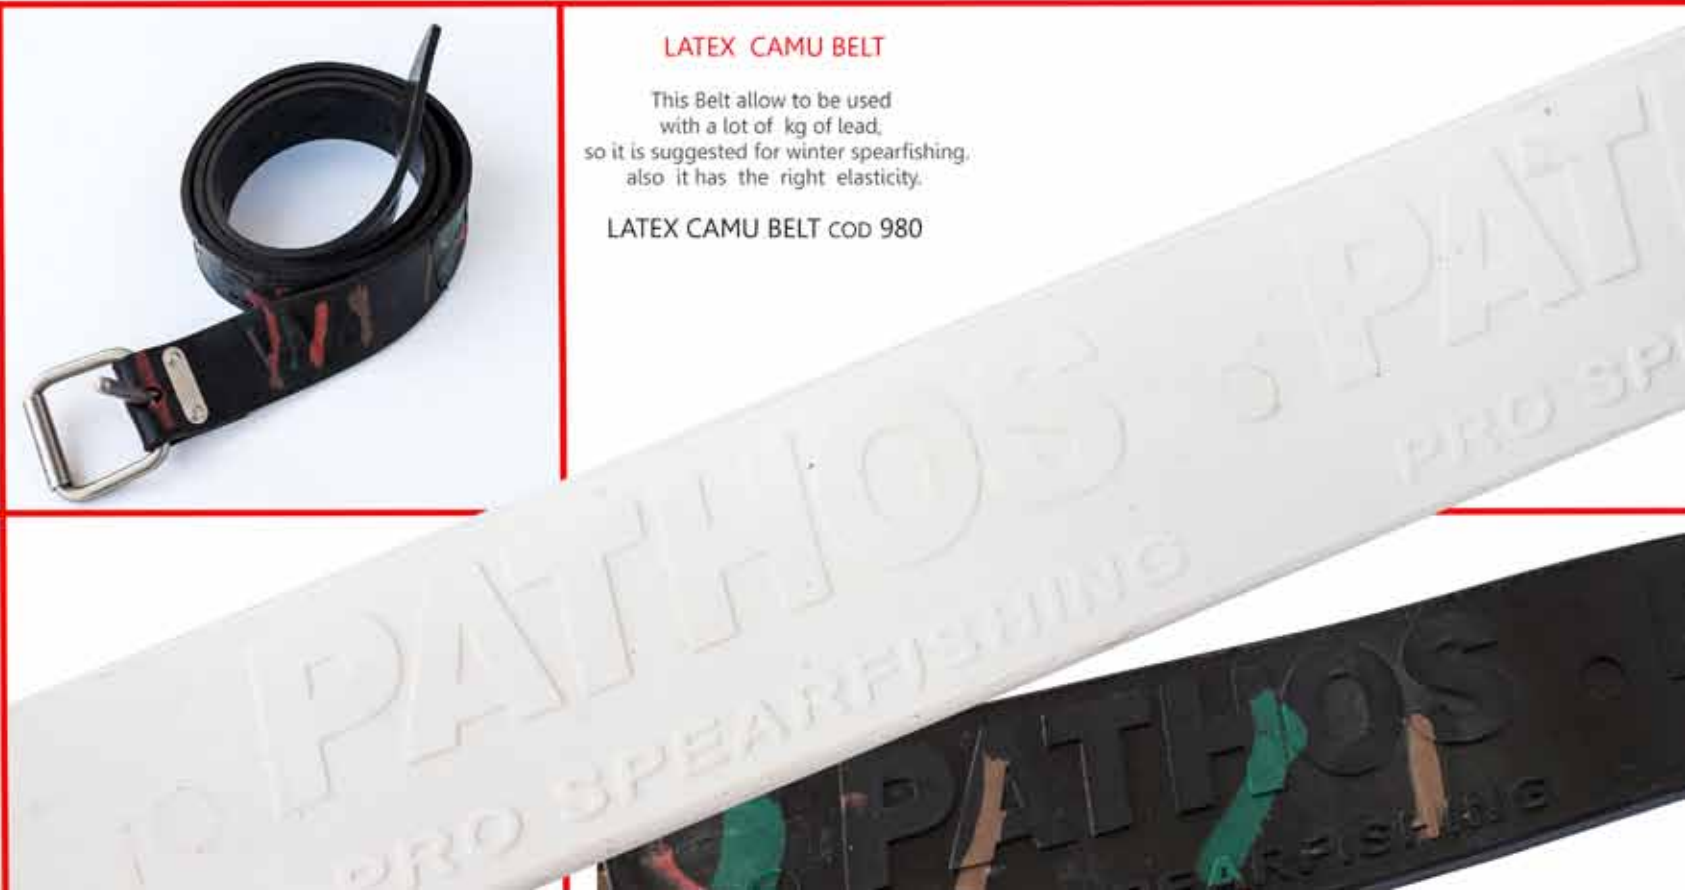

SILICON BELT WHITE COD 980

### LATEX CAMU BELT

This Belt allow to be used with a lot of kg of lead, so it is suggested for winter spearfishing, also it has the right elasticity.

## FOOT POCKETS

Pathos footpockets are reportedly the best footpockets in the market today. Not only they have the lowest weight but they are also one of the most comfortable pockets you will ever use. Installation is easy and effortless since all you have to do is apply some superglue in the tendon channel and push the blade in. We made them in our factory in Greece with injection rubber machines. We use 3 kind of natural rubber to make different hardness on different points. Nerves are very thin to make the blade work at his best and at 100%. Also are available with Hard nervs or Soft nervs for all kind of blades.

Hard nervs will allow the blade to work mainly on the tip

Soft nervs will make the blade work on all his lenght

### CARBON FINS PATHOS

The carbon fins Pathos are made of 100% carbon fiber made with a process of 2 days in pressure and one in high temperature, are very reactive and very light assembled on pathos foot pockets. Best choice for spearfishers and freedivers

The angle is 22°  
 88 cm length  
 19,4 width  
 680g weight  
 3 hardness  
 SOFT (<75kg)  
 MEDIUM (>75<90kg)  
 HARD (>90 kg)

Hardness	SOFT	MEDIUM	HARD
cod	850	848	849H

PRO SPEARFISHING

## ABYSS

### CARBON FINS ABYSS

The carbon fins ABYSS are made of 100% carbon fiber of the best quality and they are made with a process of 5 days in pressure and one in high temperature.

This process and the resin we use made the Abyss 5 times more reactive than others fins on market, Assembled with Pathos footpockets.

Best choice for very experienced spearfishers and freedivers.

The angle is 22,5  
cm length 92  
cm width 20  
700g weight

3 hardness SOFT (<75kg) MEDIUM (>75<90kg) HARD (>90 kg)
